INFORMATION DISCLOSURE STATEMENT

Attached hereto is a copy of the recently received European Search Report and a translation thereof. Also attached are copies of those references not already of record.

In addition hereto attached is a German Office Action that cites one of the references and says (in English) in the second paragraph of section I, "The subject matter of current claim 1 is distinguished from this cited state of the art in that..." Thus the cited art is not considered pertinent to novelty and in fact the German Patent Office has allowed the application.

The undersigned certifies that each item of information contained in this Information Disclosure Statement was cited in a

communication from a foreign patent office in a counterpart foreign application not more than three months prior to the filing of this Statement.

Thus all of the cited art is purely background and is not relevant to patentability. It is not closer to the instant invention than the art cited in the US patent application cited above.

Since the Search Report is more than three months old, the requisite \$1.17(p) late-consideration fee is also enclosed.

Attention is directed to 1194 OG 167 (7 January 1997) which states with reference to information submitted in an Information Disclosure Statements "Where the information listed is not in the English language, but was cited in a search report by a foreign patent office in a counterpart foreign application, the requirement for a concise explanation of relevance can be satisfied by submitting an English language version of the search report

which indicates the degree of relevance found by the foreign office."

Respectfully submitted,
The Firm of Karl F. Ross P.C.
